Front-End Developer capable to build ideas into authentic and attractive experiences. I have collaborated in creating important solutions in teams, managing clear communication and good organization in order to meet the objectives set. I have developed websites always seeking to ensure that every detail generates value and conveys the brand identity.

EXPERIENCE

Exytur

Full-Stack Developer

Chiapas, México

November 2023 – March 2025

- Developed a web application to optimize internal processes and manage the company's sales records.
- Automated the sales procedure to store and organize information within the system, improving its organization by 60%.
- Designed views where employees can quickly retrieve information and create dynamic forms depending on the sale to be generated.
- Built an automated reporting feature in a PDF file of the employee's daily sales, which can be consulted at any time with up-to-date data.

Universidad Politécnica de Tapachula

Full-Stack Developer

Chiapas, México

August 2023 – August 2024

- Contributed to the development of an internal university system where teachers, students, and administrators can access and manage their activities.
- Implemented RESTful APIs and CRUD operations across multiple system modules, organizing information into attractive interfaces.
- Designed componentized interfaces reusable across more than 5 different views.
- Generated and optimized annual Excel reports, improving queries by 40%.
- Implementation of Git Flow strategy to work in parallel with other team members.
